- JavaScript (ES6+), TypeScript
- HTML5, CSS3, SCSS, Tailwind CSS
- RESTful API
- Ant Design, Material-UI
- Web3.js, Blockchain integration
- Git, Agile/Scrum
- Design Patterns: Singleton, Prototype, Observer

LANGUAGES

- English: Intermediate – able to communicate with foreign clients

EDUCATIONAL HISTORY

Bachelor of Software Engineer

FPT University | 2017-2021

WORK EXPERIENCE

FPT IS

Front-end developer | Apr 2023 - Present

Project: CRM, DMS, PPF, IWM

Description: Developed systems for customer relationship management (CRM), Distribution management system (DMS), and Procurement Process Flow (PPF), Intelligence Worker Management (IWM)

- Responsibilities:
 - Built modules for customer management, order processing, and product catalog using ReactJS.
 - Integrated with RESTful APIs and handled large-scale data processing.
 - Implemented the Singleton design pattern for API calls to optimize request management and reduce redundant requests.
 - Assisted in deployment and system maintenance.
 - Review membership code,
- Achievements:
 - Successfully completed and delivered CRM, DMS, PPF, and IWM projects, which were successfully commercialized and brought to market.

■ **Technixo**

Front-end developer / May 2022 - Mar 2023

Project: Decentralized Perpetual Trading Protocol

Description: Developed a decentralized trading platform focused on perpetual contracts, enabling users to trade with leverage in a non-custodial manner.

- Responsibilities:
 - Built an intuitive user interface using ReactJS.
 - Integrated Web3.js for blockchain interaction
 - Optimized performance for real-time transactions.
 - Review membership code,
- Achievements:
 - Enhanced real-time trading experience by improving UI responsiveness and rendering performance.
 - Reduced API call latency, improving transaction processing speed by 40%.

■ **CMC GLOBAL**

Front-end developer / Sep 2021 - May 2022

Project: AeviceMD (Healthcare System for Singaporean Client)

Description: An outsourced project developing a system for patient record management, appointment scheduling, and online health consultations.

- Responsibilities:
 - Developed UI using NextJS and Ant Design.
 - Optimized performance and improved UI/UX.
 - Integrated RESTful APIs for data communication.
- Achievements:
 - Enhanced UI/UX by optimizing component reusability and state management.
